7. Independence Day – 15th August 2021.

Independence Day marks the end of British rule in 1947 and the establishment of a free and independent Indian nation. It also marks the anniversary of the partition of the subcontinent into two countries, India and Pakistan, which occurred at midnight on August 14-15, 1947.

This day is no less than a festival for cadets as they practice and work hard for months to improve their drill so that they do the March Pass in the highest honour of the National Flag without any mistake and define our motto- Unity and Discipline.

We celebrated 75th Independence Day under the guidance of Lt. Dr. Dhiraj Deshmukh and chief guest Principal Dr. Pandit Shelke. There was a March-Pass troop commanded by SUD Vishal Kolte followed by right marker JUD Aditya Shelar and left marker CDT Shubham Kunjir. The troop included third year and second year cadets. JUD Shubham Katkar and CDT Sagar Kadam were the pilots on this occasion.

16. Trekking – 19th September 2021.

One of the major benefits of trekking is that it improves our physical health immensely. Spending multiple hours on the trail, climbing around boulders, rock hopping and ascending hills give our whole body a workout, improving our strength, agility and cardio fitness. We organized a trek for NCC cadets so that they spend time with nature and develop unity.

A handwritten signature in blue ink, which appears to be 'Dhiraj V. Deshmukh', is written over the typed name.

ANYONE ?

circumference of a circle is slightly greater than its diameter. The exact ratio is the ratio of a circle's circumference to its diameter.

$$\frac{c}{d}$$

approximately equal to 3.1415926... an irrational number, which means that it can't be expressed as a ratio of two integers; therefore, its decimal representation never ends or repeats.

the value in fraction is 22/7. It is an irrational number that digits after decimal point are non-terminating & non-repeating.

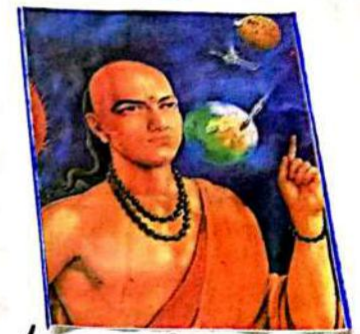

Pi is defined as the ratio of the circumference of a circle to its diameter. It was first calculated by the Babylonians in 1700 B.C.

Aryabhata Indian Astronomer & Mathematician

He was the first major mathematician, astronomer from the classical age of Indian mathematics & astronomy, which gave the world the digit '0'.

• Approximation of pi. Arya bhata discovered an approximation of pi, $62832/20000 = 3.1416$. He also

correctly believed that the planets & the moon shine by reflected sunlight & that the motion of stars is due to Earth's rotation.

- Arya bhata was born in Taxila, In Bihar, India.
- Born - 476 C.E
- Died - 550 C.E
- Era- Gupta Era.
- Main Interest - Mathematics, Astronomy.

NUMERACY SKILLS

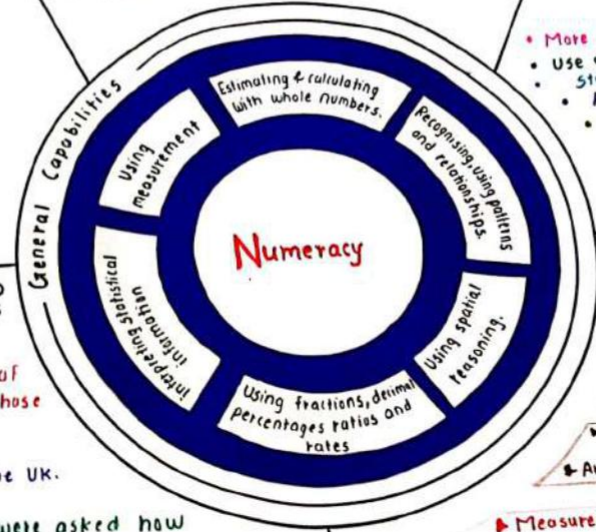

Numeracy skills refer to the ability to use, interpret and communicate mathematical information to solve real-world problems...

Numeracy is not always taught in the classroom; it means having the confidence and skills to use maths to solve problems in everyday life. Numeracy is as important as literacy - it's sometimes called 'mathematical literacy' - and we need both to get on in life.

These include the ability to understand basic math like

- Addition
- Subtraction
- Division & Multiplication

- More advanced numeracy skills incorporate
- Use of graphical, statistical
- Algebraic concepts and
- The ability to interpret that data and apply it to real-world situations.

Effects of Poor Numeracy Skills.

- Affects people and Organisations.**
 - less likely to be able to save money on day-to-day affairs, like a visit to market.
- less likely to be able to find or negotiate the best deals on financial products.
- To pay higher levels of interest on higher levels of debt.
- It is well documented that debt problems can lead to stress and/or depression.

Why numeracy skill is needed?

It may come as a surprise that almost half of the working-age population (17 million) of England have numeracy skills equivalent to those expected for an 11-year-old child.

This problem is not unique to England or the UK.

In a study in Australia, business leaders were asked how poor numeracy affected their businesses.

Over three-quarters of respondents said that their businesses

▶ Working with graphical information and specialized software such as data visualization software and flowchart software.

▶ Visual perception of info;

▶ Ability to remember;

▶ Knowledge of numbers & figures;

▶ Argumentation & logical thinking;

▶ Language skills

▶ Scheduling or budgeting;

▶ Ability to organize information

▶ Measurement and data analysis;

▶ Interpreting mathematical information

▶ Understanding relationships between numbers.

Examples of numeracy skills

- 1) Calculation Skills
- 2) Interpreting mathematical information
- 3) Understanding the relationships between numbers.
- 4) Understanding the relationships between numbers.
- 5) Measurement and data analysis

3. Tree Plantation - 25th July 2021,

Tree plantation is significant because it is linked to our basic need for good food to eat and clean air to breathe. Aside from these necessities, they preserve biodiversity. Like every year, this year also our NCC cadets planted trees in the environment. We planted 21 new saplings in our college campus. These saplings are now grown and survived. 40 Cadets Participated and planted new saplings.

12. How do your activities contribute to the mission and vision of the institution

World Health Day is celebrated every year on 7 April to commemorate the anniversary of the founding of the World Health Organization (WIO) in 1948

Each year for this date, a theme is chosen that highlights an area of priority concern for World Health Organization (WIO). In the face of the current pandemic, a polluted planet, and an increasing incidence of diseases, the theme for World Health Day 2022 was Our Planet, Our Health. Hence the guest lecture was arranged on "The unparalleled value of good health." The Honorable Speaker Mrs. Pallavi Vishal Ghule, Laboratory Scientific Officer, Public Health Laboratory, Maharashtra Government imparted knowledge on importance of health as well as facilities available at Public Health centres of Maharashtra Government.
