Cervical cancer Awareness

2023-2024

Cervical cancer Awareness: Notice

Pune District Education Association's
Annasaheb Magar Mahavidyalaya
Hadapsar, Pune-411028
Maharashtra, India

Date: 18th January 2024

Notice

Cervical cancer is the 2nd most frequent cancer among women in India. 83.2% of invasive cervical cancers are attributed to Human Papilloma Virus. Every year, an estimated 1, 23, 907 women are diagnosed with cervical cancer. This dreadful cancer can be prevented by the HPV vaccination. We can save lives by creating the awareness about Human Papilloma Virus (HPV) vaccination programme. In this Cervical Cancer Awareness Month January 2024, let's take one step towards by taking the pledge raising HPV awareness.

All the staff and students are hereby requested to take the pledge via the link:

Cervical cancer Awareness :Summary

Summary

All the Students and Staff of Annasaheb Magar Mahavidyalaya Hadapsar Pune 411028. Were made Aware of were made aware of Human Papilloma Virus (HPV) vaccination. Globally, cervical cancer is the fourth most common cancer in women, with 604 000 new cases in 2020. About 91% of the 342 000 deaths caused by cervical cancer occurred in low- and middle-income countries. HPV vaccination works extremely well. HPV vaccine has the potential to prevent more than 90% of HPV-attributable cancers.

Since HPV vaccination was first recommended in 2006, infections with HPV types that cause most HPV cancers and genital warts have dropped 88% among teen girls and 81% among young adult women. Fewer teens and young adults are getting genital warts. HPV vaccination has also reduced the number of cases of precancers of the cervix in young women. The protection provided by HPV vaccines lasts a long time.
