Respected sir

1) According to FYBSc practical syllabus (Sem. II) there is a practical entitled Study of comparative account of Dicotyledonous and Monocotyledonous plants. But in practical examination skeleton paper there will be no any question on this topic. Please add any one question on this topic in question paper.

2) In the same semester, it is very difficult to arrange various material which is required for practical like DNA extraction and checking it's purity by 260:280 ratio. So if it is possible please introduce another practical like DPD or Transpiration.

Thanking you

Respected Sir,
According to **FYBSc** revised syllabus (16th June 2020), for Semester II, three new practicals were added. One of the new practical is "**Study of DPD by using suitable plant material**".
According to **SYBSc** new CBCS syllabus (from 2020), for semester III, one of the practical is "**Determination of Diffusion Pressure Deficit (DPD)**". This experiment is not related to the theory syllabus of SYBSc.

I think both practicals are the same. I think the DPD experiment is related to FYBSc theory syllabus. Please guide us regarding the same.

Syllabus for CBCS pattern.**

Respected Sir,

As the new syllabus for T.Y.B.Sc.(CS) CBCS pattern will be implemented from 2021-22. I have some suggestions to be considered while designing the same.

1. Advance Operating System Concepts must be in second semester.
2. Web Technology should include HTML5, CSS3, Bootstrap as it is prerequisite for PHP programming. In advance PHP try including JQuery, Text Script, CodeIgniter, WordPress.
3. Project Work should be mandatory for all students.
4. Students have use Python programming at SY level in Maths and Electronics, So Scope Implementation and application of Python must be clearly defined. Also give freedom that Students can do Projects in Python.

Please do the needful.

**Subject: Suggestions for T.Y.BSc.(Computer Science)
Syllabus for CBCS pattern.**

Respected Sir,

As the new syllabus for T.Y.BSc.(CS) CBCS pattern will be implemented from 2021-22. We have some suggestions regarding networking and software testing course. They are as follows:

1. More focus should be given on Network security like Firewall, Digital Signatures
2. New Software Testing Tools like selenium IDE in detail must considered in electives after considering the availability of the software.
3. Implementation of the testing tools should be the choice of College.
4. It is observed that open electives are introduced in the syllabus but at UG level considering the volume of students it becomes difficult to implement elective courses. So, it is suggested that it will be better if we offer only one course as SECC in every semester.

Please do the needful.

Respected Sir,

As the new syllabus for T.Y.B.Sc.(C.S.) CBCS pattern will be implemented from 2021-22. We have some suggestions to be considered while designing the same.

1. In the structure available on SPPU web site it is found that Project Work is optional. In my opinion it should be made compulsory course as it allows students to work on a system as a whole.
2. For the project equal weightage should be given for project design and implementation.
3. Mobile application development is included in the syllabus but we already have Mobile computing which includes android programming in M.Sc.(C.S.). As such the syllabus at TY level should be clearly defined.

Please do the needful.

Dr. Murumkar sir,

T.C. College, Baramati,

Subject: Some suggestions regarding the SYBSC syllabus

Respected sir,

Good afternoon. Sir as per email I am sending here some of my suggestions regarding the syllabus. Kindly consider the same for the betterment of the syllabus from the interest creation and giving applied knowledge to the students.

Sir I hope that you will definitely consider the same for the new era of Botany.

Thanking you

Yours sincerely

Suggestions for SYBSc Botany syllabus (10/05/2020)

In the first paper of Botany 2301 Angiosperms Taxonomy

1. The title of this course can be Taxonomy of Plants (Flowering & Non-Flowering)
In this course we can add like this.

2. Only keeping the Angiosperms taxonomy in the syllabus may reduce importance of other groups which are really important like Fungi, Lichens, Pteridophytes & Bryophytes.

3. As we all know that loss of biodiversity is taking place from every possible place so its our responsibility to include these groups for conservation of biodiversity.

4. Instead of putting –topic like 3. Taxonomic literature (3L)

Flora, monograph, revisions, manuals, journals, periodicals and references books.

We must give how students can contribute in the same through their available resources rather we must tell them to prepare one paper at the end of their study course.

5. Instead of giving the topic -4. Sources of data for Systematics (6L)

4.1 Morphology, 4.2 Anatomy 4.3 Cytology 4.4 Embryology 4.5 Phytochemistry

4.6 Molecular biology

We can give at least 1 simple protocol for getting some desired results of test or flow chart which will help students to develop their research interest.

5. Instead of old ICBN we must include now-International Code of Nomenclature for algae, fungi, and plants (Schenzen code 2018, which is the most latest one)

In the paper II of Botany BOT 2302 Plant Physiology

6. We can combine the Biochemistry and Molecular biology introductory topic will definitely be useful for all students for creating interest about Botany as a applied subject also.

And accordingly practical's can be designed.

Thank you

Subject :- Suggestion for T.Y. B. Sc. (Electronics) CBCS pattern syllabus.

Respected Sir,

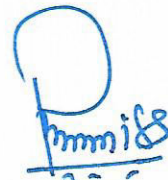

As per the new syllabus for T.Y. B. Sc. (Physics) CBCS pattern will be implemented from 2021-22. I have some suggestion regarding Electronics course as follows.

1. First Chapter Semiconductor devices please remove repeated portion which included in SYBSC Electronics I. For Ex:- Rectifier Filter, and Power supply
2. More focus should be taken on designing and problem solving approaches for electronic circuits.

Please do the needful.
