*Training for Teaching and Non teaching staff (Science Faculty)*  
***"Laboratory Safety and Maintenance"***

**Date: 12/May/2023**

Sr. No.	Title	Description
1	Training for Laboratory Staff	<b><i>"Laboratory Safety and Maintenance"</i></b>
2.	Committee Members	i. Mr. Ghorpade Suryakant S. (Physics) ii. Mr. Jedhe Sanjay C. (Microbiology) iii. Mr. Pawar Sandipan E. (Zoology and Botany)
3.	Aims and objectives of the training Programme	i. To enhance the awareness of safe practices in Physical, Chemical and Biological Science laboratories ii. To promote a safety-first mindset in the future. iii. To procure knowledge of maintenance of instruments
4.	Was the activity calendar prepared? Yes / No	Yes
5.	Number of participants	<b>Teaching Staff: 11 and Non-Teaching staff: 16</b>
6.	Activity report submitted to	i. Principal / Vice Principal / Registrar: Yes ii. HODS for monthly report : Yes iii. Magazine : Yes iv. IQAC: Yes
7.	How do your activities contribute to the mission and vision of the institution?	The vision and Mission of institution is to provide holistic development of staff to build a healthy day to day practice by organizing such training programmes. The staff will be in position to comprehend the laboratory requirements for an effective safety measures.

P. T. O.

## SUMMARY

### The Importance of Laboratory Safety and Maintenance

Laboratory safety is an essential part of ensuring the health and safety of workers and researchers in laboratory settings. Laboratories can be hazardous environments with various potential risks, including chemical spills, fires, explosions, and exposure to hazardous substances.

The importance of laboratory safety cannot be overstated. In addition to the risk of accidents and injuries, laboratories also pose a risk to the wider community, as hazardous substances and waste products can be released into the environment if proper safety measures are not in place.

To help ensure the safety of workers and researchers in laboratory settings, employers need to implement a comprehensive laboratory safety program. This should include training workers on how to properly handle and use hazardous substances, as well as procedures for emergency response, waste disposal, and spill containment.

In addition to training and procedures, employers should also ensure that laboratory workers have access to the appropriate personal protective equipment (PPE) for the tasks they are performing. This can include gloves, safety glasses, lab coats, and respirators, depending on the hazards present in the laboratory.
