Report

- **SUGAR:**

The sugar which is a Carbo-hydrate is obtained from sugar cane and is known as Cane Sugar. It contains 99.50% sucrose. Actually, cane sugar is chemically known as Sucrose which is disaccharide. It is soluble in water. Sucrose is dextrorotatory on hydrolysis.

- **BAGASSE:**

Bagasse is the residue obtained from crushing cane in the mills. It contains about 50% moisture and 2% sugar and the balance is fibre. It is also very commonly used as fuel in boilers in the Sugar Factory. Bagasse is used as a raw material for the production of Cellulose, Furfural, Paper, Particle board, Cattle feed etc.

- **MOLASSES:**

Molasses which is also known as black strap molasses or treacle is a dark brown viscous liquid obtained as a by-product in processing Cane Sugar. It contains nearly 45% uncrystallized, fermentable Sugar & some Sucrose.

- **RECTIFIED SPIRIT (RS):**

It is manufactured by Formation & Distillation of molasses.

It is used for manufacturing of Acetic Acid, Acetone, Oxalic Acid Absolute Alcohol & other various chemicals.

- **ABSOLUTE ALCOHOL (ETHANOL):**

It is manufactured by Azeotropic Distillation.

It is used as Fuel in Automobile and also in Pharmaceutical Industries.

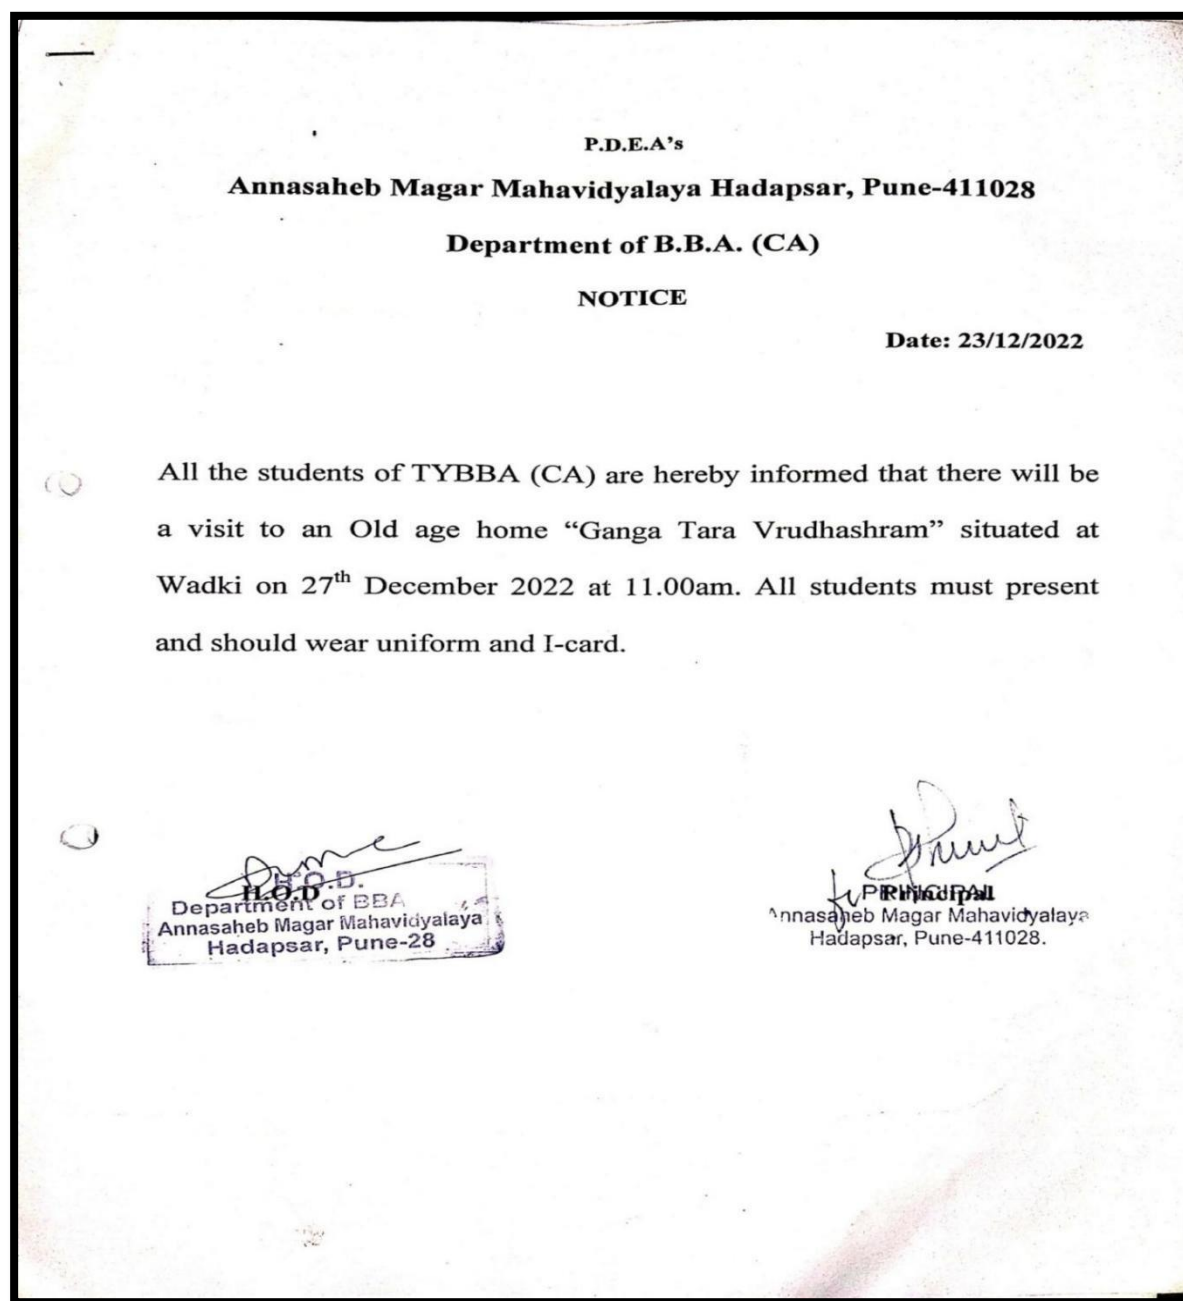

Alcohol Technology & Biofuel -

To help distillery industry in their efforts to achieve economic progress with efficient use of resources and energy input and for adoption of modern technology in focused areas, viz. fermentation, distillation and effluent treatment systems

To undertake research for developing cost-effective alcohol production technologies from alternate raw materials. Develop potential yeast strains with high alcohol and/or high temperature tolerance for the benefit of the distillery industry. Develop database/ data bank for distillery industry for the purpose of review or formulation of new strategy, to propose action for further improving their performance.

On 9 th May 2023, 63 students from the psychology department with two professors, Prof. Deokar S.M & Prof. Dake A.K. went for a one day field visit to Jagruti Rehabilitation Centre with an aim to gain first hand practical experience of the rehabilitation and health care setting.
Visit to rehabilitation centre was very informative, in the society there are various misconceptions and stigmas about the rehabilitation centre but after visiting the centre, I got the real experience of functioning of the centre. Whole tour of rehabilitation centre gave the understanding of how a rehabilitation centre works? How they give treatment to their patients with what facilities they operate the centre. The whole team of Annasaheb Magar Mahavidyalaya was guided by Dr. Amashinde & his team, who explained in detail about the functioning of their centre & the speciality of their centre.

<p>In this rehabilitation centre they have rooms called 'Acute rooms' in which patients severe symptoms are admitted. They also have 'General Wards' for patients of addiction. In the centre they gave speciality treatment to Dementia patients. In the centre they have separate wards for male & female patients. They also provide special rooms for individual patients. In this way they distributed their patients. From the tour, now I am aware of how a rehabilitation centre functions, also I was able to relate what I have read, studied or learned from course.</p> <p>Jagruti rehabilitation centre is serving in the society in the field of mental health care for past 18 years, which was founded by Vijaya Shinde. They have 5 branches in three cities, Mumbai, Delhi & Pune. The pune branch gives treatment services for Mental wellness, Dementia & De-addiction. The centre functions with team of psychiatrists, psychologists, counsellors, general physician and other helping staff.</p> <p>This field visit gave the inside information about a rehabilitation centre I got to know through Dr. Amar shinde sir and team. Specially the guidance and the interactive session with Dr. Amar shinde sir and team was a great learning experience. It was an amazing first hand experience in clinical psychology & psychology rehabilitation.</p>

B.Voc. (Tourism) is a bachelor level Travel and Tourism course. Duration of this course is 3-years long and its syllabus is divided into 6-semester at Annasaheb Magarmahavidyalaya, Hadapsar.

For fulfillment of the syllabus we organized a one day field survey at "Ramdara" for students, where 18 students took part in it from FY, SY and TY B Voc. We successfully had done the trip on April 1, 2023.

Ramdara temple is a perfect blend of Nature, tranquility, religion and history. It is located at Lonikalbor village in outskirts of Pune city. Temple was built by Shri Devipuri Maharaj (Dhundibaba) in 1970 with the help of villagers near the ancient relics found in the hills. According to locals there were some ancient temple dating to antiquity there and a well which was believed to have been used by God Ram and Goddess Sita in ancient times. Baba personally designed the Temple according to the ancient Science of 'Vastu Shastra' and designed the moat and Lake which harvested rainwater during the Monsoons.
