Report

A lecture on “**Ecological Consciousness in Indian Classics**” was organized in the department of English in **Annsaheb Magar College Hadapsar** on **23 March 2023**. The speaker was Dr. Shubha Tiwari, Professor, APS University, Rewa, Madhya Pradesh. The lecture focused on the solutions in the ancient literature for the ecological distress that human beings face today. The lecture also focused on the career opportunities one can have with the knowledge of Indian scriptures and literature as there is a new ministry formed for Indian Knowledge Management. She commenced the talk with the cure of man’s “Saviour Mentality” and the mortality of human beings and the eternity of the planet Earth. She explained how people in ancient India managed the ecological concerns as they reflect in the Vedas, Upanishads and Bhagavad Gita. She also spoke on the close affinity and friendship between human beings and nature that is found in Walmiki Ramayan and Kalidas’ Abhijaat Shakuntalam and Meghadoot. She reflected on the Pre-Varna Indian society that practiced “**Adwait**” i.e. no duality, with no social or any kind of hierarchy and where everyone was equal and one. It is the **Spirit of Oneness** not only among human beings but also with all the living and non living entities on the planet. Consequently the philosophy of oneness even with nature doesn’t raise any question of man doing something for nature. According to Dr. Tiwari, it is the Spirit of Oneness with nature that resolved the duality of everything in the ancient India. Dr. Tiwari emphasized on going back to this “Sanatan (Sada Nootan) i.e. “always new’ ancient philosophy advocated in the Vedas and Upanishads to resolve the current ecological problems and crisis. She also was realistic that it would take time as the damage done is irreversible. She concluded on the positive note that the government’s initiative to resolve the ecological distress by 2040 and every individual’s contribution by going back to the ancient philosophy of oneness can certainly heal the damage done to the ecological system in the longer run.

The session was very enlightening and invigorating to the students in creating awareness of our ancient literature and the ancient Pre-Varna Indian philosophy. The whole point of finding answers to the problems of ecology in these literatures has opened a whole lot of avenues to the further exploration in this area to the research scholars.

The principal of the college Dr. Nitin Ghorpade gave the introductory remarks to the session, the session was observed by Ms. Shashikala Walmiki, Asso Prof. and the HoD of English

Career Counselling Lecture

Date: - 26/12/2022
Time: - 11.00am to 01.00 pm

Report

On 26 December 2022 at 11 a.m. career counselling lecture was organized for FYBA & SYBA students. Psychology Professor Ashwini Doke delivered a lecture on career opportunities in the field of Psychology, and overall arts career opportunities. Total 237 students were present for this lecture.

She explained the following points in the lecture. Humanities are academic disciplines that study aspects of human society and culture. In the Renaissance, the term contrasted with divinity and referred to what is now called classics, the main area of secular study in universities at the time. Today, the humanities are more frequently contrasted with natural, and sometimes social sciences, as well as professional training.

It is the biggest and most extensive field covering a variety of topics and subjects such as anthropology, archaeology, law, religion, music, arts, linguistics and languages, politics, philosophy among others.

For many decades, there has been a growing public perception that a humanities education inadequately prepares graduates for employment. The common belief is that graduates from such programs face underemployment and incomes too low for a humanities education to be worth the investment.

Humanities graduates find employment in a wide variety of management and professional occupations.

- Arts as a career stream are most rewarding for people who are passionate and talented.
- Low entry barrier at most colleges enables a quick and easy admission process.
- Fee structure and duration of classes is comparatively lower than other streams.

Career opportunity in Psychology

Psychology is both a science and a profession. As a science it is a systematic approach to the understanding of people and their behavior. Psychology can be broadly defined as the study of the mind (normal or abnormal). Psychologists carry out research and conduct programs in an attempt to understand human behavior to help solve human problems. Psychologists apply their knowledge and techniques to a wide range of human services, management, education, law and sports.

Psychologists gather information for diagnosis and remedial work through tests of personality; performance; aptitude and intelligence; observation, interviews and questionnaires; clinical studies; or surveys or controlled laboratory experiments. Psychologists specialize in many different areas:

- **Educational Psychologists** design, develop and evaluate educational programs. They deal with learning, behavior and emotional problems as well as with handicapped children

Personality Test for a Probable Career Choice Report

A Self Assessment Test for Career Choice

Report 2022-23

Looking at the overwhelming participation in the previous academic year, the department of English conducted a personality Test for the probable careers the students can think of taking after their graduation. The intention of the test is to help the students understand their personality in terms of their behavioural pattern, temperament and preference so that it can help them to choose the right career in which they can find pleasure and other preferences.

A questionnaire was prepared for the students to test their personality and the analysis was done and communicated in person analyzing their answer. The intention was to make them understand themselves better and choose their career as per their preferences. The test was organized on 28 January 2023 between 8.00^{am} and 8.30^{am}, for both the Arts and Commerce Faculty. It was quite overwhelming participation of three hundred eighty three (383) from both the faculties. The result was analysed and was informed individual as per the convenience of the students in their personal approach to the examiner. The overwhelming response of the student has encouraged the department concerned to conduct the similar test in the next academic year too.
