Brief Report of Prof. P. A. Pandya Endowment Lecture Series dated 25/10/2018.

The Indian Physics Association (IPA) organizes “Prof. P. A. Pandya Endowment Lecture Series” every year. In this academic year, 2018-2019, the honor of organizing the lecture series was conferred to IPA, Pune Chapter. The IPA Pune Chapter has extended this opportunity to host the Lecture Series to PDEA's Annasaheb Magar Mahavidyalaya, Hadapsar, Pune-411028.

For this endowment lecture, Prof. Sanjeev Dhuradhar, Emeritus Scientist, IUCAA, Pune was the Resource Person. The topic of his talk was “Nobel Prize in Physics- 2017: Discovery of Gravitational Waves”.

On this auspicious occasion, office bearers of IPA, Pune Chapter, President Prof. Sanjay Dhole, Vice President and Principal of the college, Prof. Sharmila Chaudhari, Secretary Prof. Mathe, Treasurer, Prof. Sartale and Vice Principal Prof. B. S. Bendre were present. All the members of Faculty of the College were also present.

The program began with the Saraswati Poojan followed by felicitation of all the delegates by the Principal Dr. Sharmila Chaudhari. Prof. Sanjay Dhole briefly introduced the “Prof. P. A. Pandya Endowment Lecture Series” and introduced Prof. Sanjeev Dhuradhar to the audience.

Prof. Sanjeev Dhuradhar began his talk right from Kepler's Laws followed by Newton's laws. In 1905, Einstein introduced Special Theory of Relativity. He explained how the Newtonian gravity was inconsistent with the Special Theory of Relativity. In 1915, Einstein introduced the General Theory of Relativity and in 1916, he predicted the existence of Gravitational waves. After 100 years i.e. in the year 2016, direct detection of Gravitational Waves was possible. However, in between a few indirect predictions were also obtained.

He demonstrated how weak is the gravitational waves compared to the other forces in nature. He further explained about **Laser Interferometry Gravitational Waves Observatory (LIGO)**. As the Gravitational waves are very weak, the signal was recovered by filtering the data obtained from the observatory. The necessary algorithm was created by the team led by Prof. Dhurandhar. Finally he explained about LIGO- India Project being developed at Nanded, Maharashtra and explored the tremendous job opportunities to young science and technical aspirant.

The Lecture was concluded by the question- answer session pacifying the queries of the students.

Prof B. S. Bendre proposed the vote of thanks and concluded the session with permission of the chair.

Report

A one day workshop on “**Embedded Robotics using 8051 Microcontroller**” was organized for the students of FY/ SYBSc(CS) in Electronics Lab on 22/08/2018 from 10.00 am onwards. Total 46 students who were interested had participated in this workshop.

This workshop was organized to make students aware about the Robotics. They were informed about robotics field and these technologies are used to develop machines that can be use as a substitute for humans and replicate human actions. Robots can be used in any situation, any purpose and for as much required time without stopping .Today many robots are used in dangerous environments like bomb detection and de-activation, manufacturing processes, or where humans cannot survive. Information about the embedded robotics was given to the students. This helped them understand about what robotics is and how they can shape their studies to form a carrier in the same.

Following topics were covered in this Training session-

- (1) Introduction of Robotics
- (2) Different types of Robots
- (3) Use of 8051 Microcontroller for Robotics
- (4) Programming Robots using Embedded C Language
- (5) Creating/ making a Robot using different materials like motor, base, 8051 microcontroller, wire connections, batteries, etc.
- (6) Demo of basic types of Robots like Line-Follower, Robotic Car, Obstacle detection robot.
