The screenshot shows a screen sharing session of a document in Adobe Acrobat Reader. The document contains handwritten mathematical work. At the top, it says  $\bar{x} = 2 + 5 = 7$ , with a box around the result and the text "mean =  $\mu_1 = 7$ ". Below this, it says "Since  $X-5$  is let", followed by  $\mu_1 = 0$ . The main calculation is for  $\mu_2$ :  $\mu_2 = \mu_2' - (\mu_1')^2$ , which is then expanded to  $\mu_2(5) - (\mu_1(5))^2$  with a note "(since  $X-5$  is transformation of origin.)". This is further simplified to  $20 - (2)^2 = 16 = \text{variance}$ . The final result  $16 = \text{variance}$  is underlined and has an arrow pointing to it.

#### Report

Department of Mathematics (C.S)

Remedial Basic mathematics Report 2019-20

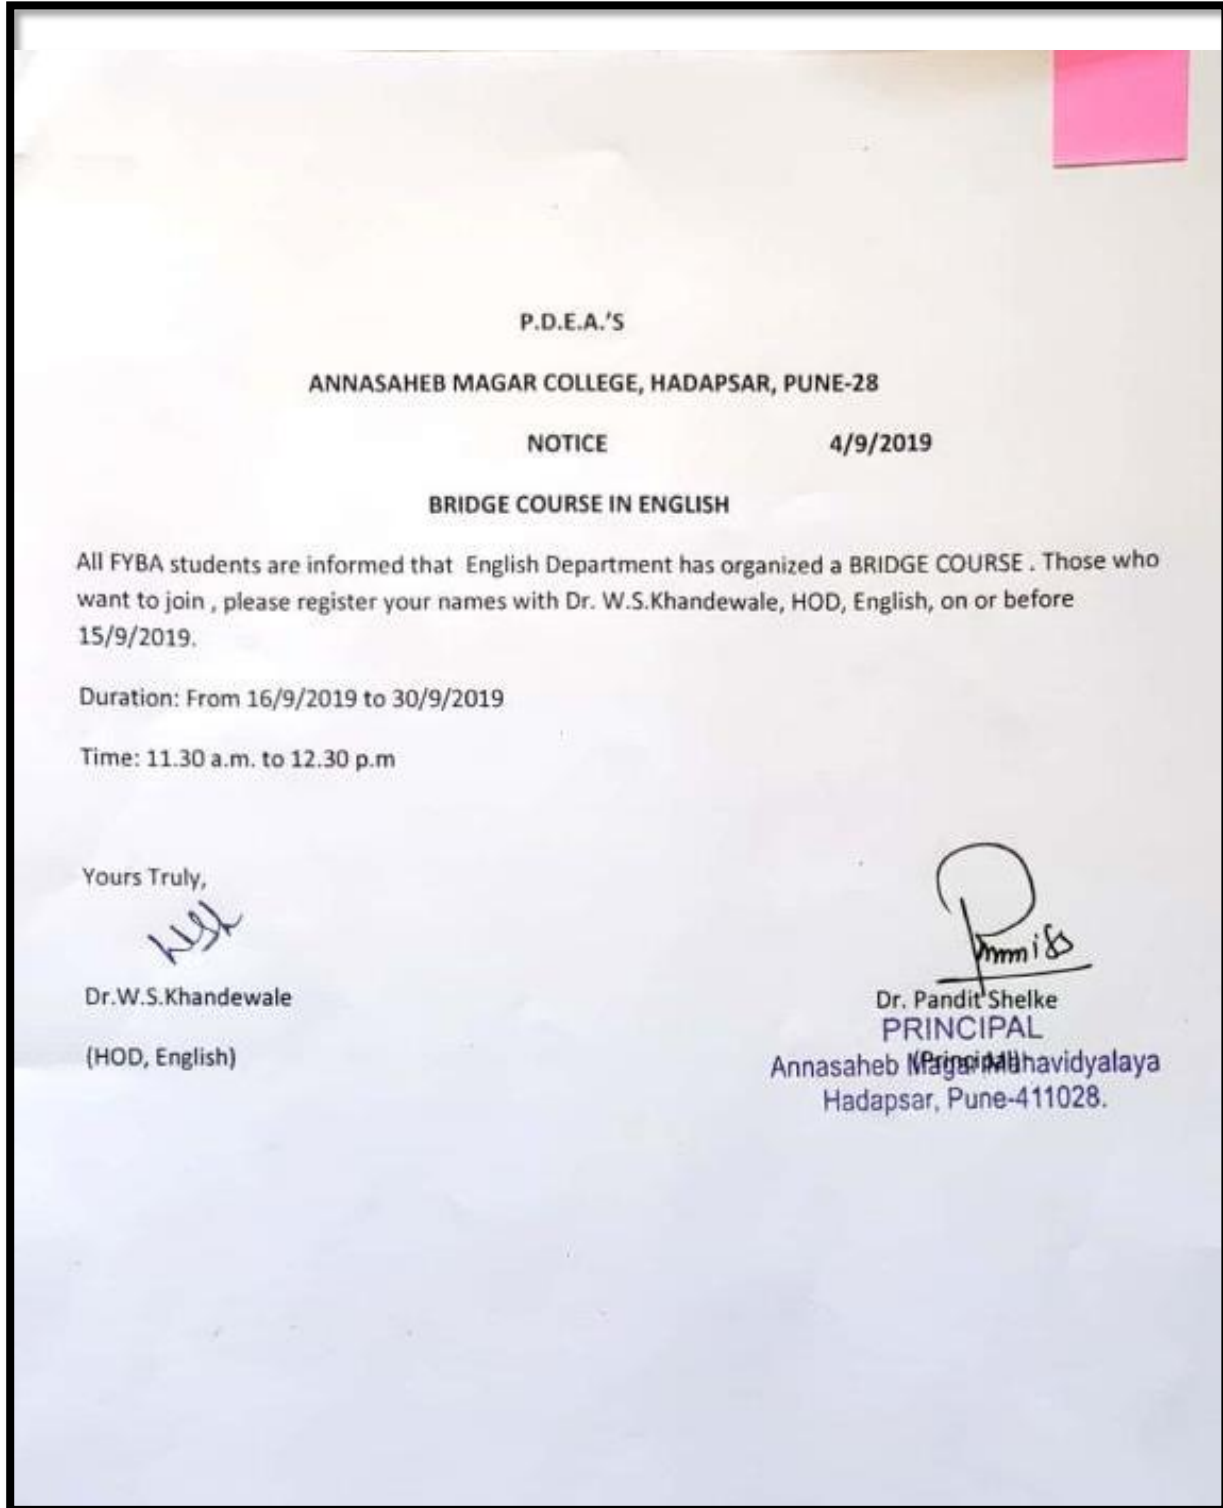

Remedial Basic mathematics Lecture conducted every year for First year and second year B.CS student by mathematics department. Teaching remedial math requires working with students to create a better foundation of math concepts by reinforcing skills that were taught at an earlier time. Learn ways to teach remedial math by identifying the student's learning issue and using a variety of approaches and assessments to overcome it.

Teaching should not only focus on the transmission of knowledge. It is also important to see that students are benefited from the entire learning process. Teachers should provide ample opportunities in class for students to practice and think what they have learnt, and allow them to solve problems by different means. Teachers should also carefully observe the performances of pupils and give them appropriate assistance, feedback and encouragement so as to help them acquire the learning skills, solve their problems and understand their own capability, thus enhancing self-confidence and improving their learning skills.
