EXPERIENCE

Web Developer Intern

Cloudnautic Jan 2023 – June 2023

- Gained valuable experience as a front-end web developer intern, where I played a key role in building the frontend for a web application. Collaborated closely with the development team to implement user interface designs and create a visually appealing and intuitive website. Leveraging my knowledge of HTML, CSS, and JavaScript.

CORE COMPETENCIES

Java, SQL, Node.js, HTML, CSS, Front-End, Microsoft Excel.

PROJECTS

Bidding Management System

The primary purpose of our system is to make **bidding tasks easy** and to develop with an **automated bidding management system**. This project **Bidding Management System** aims to develop software that covers all the aspects of bidding for the user. Served as the primary purpose of the system, providing users with a seamless and **user-friendly experience** in managing bids.

PROJECTS

E-Commerce Website

Developed responsive web pages using **HTML, CSS, and JavaScript**, ensuring compatibility and optimal performance across different devices. E-commerce website successfully provided a **visually captivating and user-friendly interface**, driving customer engagement and facilitating smooth navigation through product catalogs, shopping carts, and checkout processes. Through my contribution to the frontend development, the website achieved a **seamless integration of design and functionality**, creating an immersive **shopping experience** for users.

Food Ordering Website

Translated design **wireframes and mockups** into pixel-perfect and interactive frontend components, using **HTML and CSS to structure and style the website**. Food ordering website showcased a visually appealing and user-friendly frontend, providing a **delightful experience** for customers to browse and order food effortlessly. By leveraging my expertise in frontend development, I **successfully contributed** to the creation of a robust and **responsive website** that aligned with the design team's vision and met the requirements of the project.
